

Dear FCC Commissioners & Staff:

I want dsl. South Central Bells' test site says that my telephone line qualifies, however I can't get dsl. SCB says that there are technical reasons that I can't get it at this time. I want dsl thru my isp (iglou in Louisville KY) and not thru SCB. I do not want to change my email address and iglou's reliability is much better than having to go thru SCB.

Sincerely,

James Wyman
